

Using Self-Service Activity Management

Managing the Activity Management WorkCenter

This section provides an overview of the Activity Management WorkCenter and discusses how to access the pages of the WorkCenter for instructional staff.

Understanding the Activity Management WorkCenter

The Activity Management WorkCenter is the instructional staff access to maintain coursework and student results. The functionality is similar to the Activity Manager, and the Activity and Result Rosters, but instructional staffs only have access to their classes and/or exams. Instructional staff can update coursework items; view activity rosters, assign activities and access student attachments; and enter results. Settings in the administrative component control what actions instructional staff can perform and what data they can view. These settings are as follows:

- Institution Table – ability to update coursework and calculate results.
- Class Table – grade access.
- Section Manager – exam result access.
- Result Dates – controls when result entry can be performed.
